DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section
 made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 24-26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Brodkin et al.

Brodkin et al. teach a method of making dental material by mixing a ceramic powder with a polymer and dispensing the mixture to build a form on a platform. Brodkin et al. teach curing the shaped material on the platform to form the dental restoration. The method is anticipated because the Brodkin et al. teaches applicant's method steps. The curing step is an additional step which is permitted when the claims are drafted with "comprising" language which is open language which permits the additional process steps. [Note Claims 1-

Art Unit: 1732

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brodkin in combination with Chadwick.

Brodkin et al. teach the invention substantially as claimed.

Brodkin et al. teach a method of making dental material by mixing a ceramic powder with a polymer and dispensing the mixture to build a

form on a platform. Brodkin et al. teach curing the shaped material on the platform to form the dental restoration. The method is anticipated because the Brodkin et al. teaches applicant's method steps. The curing step is an additional step which is permitted when the claims are drafted with "comprising" language which is open language which permits the additional process steps. [Note Claims 1-3]

However, the Brodkin et al. doe not teach the specific silicone polymer which added to the ceramic polymer.

Chadwick et al. teach making a ceramic dental restoration which includes mixing a ceramic with a polymer specifically silicone.[Note Claim 5-6]

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a dental restoration using the method as claimed in Brodkin et al. with the polymer being specifically silicone because using a silicone polymer in dental restorations has been fully taught and suggested therefore a permissible substitution for the polymer of Brodkin et al. The

Art Unit: 1732

combined teachings of Brodkin et al. and Chadwick et al. renders applicant's claim as a whole obvious.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Lechert Jr. whose telephone number is 571-272-1203. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on 571-272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
